

Granulators - SM Series

Low maintenance and high operating efficiency.

Stokkermill Granulators are designed and manufactured for standard insulated wires, for thin cables (telephone or data) and lastly, for specific wires such as car harness wires, jelly cables or armored cables. Stokkermill Granulators product ranges by production capacity. There are compact machines with a production rate of 170-180 lb/h up to larger machines that can handle over 2200 lb/h input. Each piece of Stokkermill equipment can be a part of an articulated and complex system that can maximize productivity by working in the best way.

SM 1100 STANDARD & PLUS	
Power	8,5 kW 14 kW
Production	170/260 lb 220/330 lb
Dimensions	42" x 67" x 79"
Weight	1760 lb

STOKKERMILL
RECYCLING MACHINERY

SM 3000 STANDARD	
Power	24 kW
Production	330/550 lb
Dimensions	59" x 69" x 85"
Weight	2755 lb
